

End-to-End IMO Strategic Engagement Platform

1. Use Case to showcase a paperless workflow that transitions from offline, fragmented coordination into a centralized, audit-ready digital archive.
2. **User Personas to Configure Set up the following Role-Based Access Control (RBAC) personas to demonstrate dynamic UI rendering and segregated permissions:**
 - **Super User (DGS/DDG - International Cooperation):** Full configuration rights, committee setup, and oversight.
 - **Administrator:** Manages the creation of shadow committees, meetings, and document uploads.
 - **Delegation Leader:** Leads committee activities, consolidates external/internal feedback, and approves final papers.
 - **Coordinator / Group Leader:** Manages sub-groups, assigns tasks, and consolidates member feedback.
 - **Member (Initiator/Reviewer):** Reviews agenda documents, completes tasks, and provides initial draft comments.
 - **External Agency Representative:** (e.g., MoEFCC, MEA) Logs in to provide inter-ministerial feedback.
3. **Step-by-Step Process Flow**

Phase 1: Committee Setup, Agenda Ingestion & Task Allocation

- **Action:** Log in as the **Administrator** or **Delegation Leader**.
- **Demonstrate:** Navigate to the Committee Management module and select an upcoming meeting (e.g., Maritime Safety Committee - MSC or Marine Environment Protection Committee - MEPC).
- **Demonstrate:** Upload a received IMO agenda document (PDF/Word/HTML) into a dedicated "Paper Preparation Folder". Show the system automatically tagging the document by committee, agenda item, and meeting.
- **Demonstrate:** Create a task linked to this agenda item, assign it to a specific **Member** with a strict due date, and show the automated calendar alert triggering.

Phase 2: Collaborative Drafting & Internal Review (Track Changes)

- **Action:** Switch persona to the assigned **Member** (Initiator).
- **Demonstrate:** Access the assigned task via a personalized dashboard. Open the agenda document in the platform's text collaborative editor.
- **Demonstrate:** Provide inputs using structured text boxes for general deliberation notes, and make direct inline edits to the document itself using **track-changes mode**. Highlight that this maintains strict version control with automatic timestamping without altering the original source document.

Phase 3: Multi-Level Internal Approval Workflow

- **Action:** Route the document through the hierarchical approval workflow mandated by the Directorate General of Shipping (DGS).
- **Demonstrate:**

1. **Member** submits the draft with track-changes.
 2. **Coordinator (Group Leader)** receives an alert, consolidates inputs, and pushes it up.
 3. **Delegation Leader** reviews the consolidated position paper and adds strategic edits.
 4. **Approver Chain:** Show the file moving through the final official chain: **CS/NA/CSS to DG Shipping to MoPSW.**
- **Key Feature:** Show the version comparison tool allowing approvers to accept/reject changes to create a "Clean Copy".

Phase 4: Simultaneous External Agency Consultation

- **Action:** Log in as the **Initiator / Delegation Leader**.
- **Demonstrate:** Send the internally cleaned draft simultaneously to 5 external agencies for inter-ministerial consultation.
- **Demonstrate:** Switch to an **External Agency** persona. Show them logging in, reviewing the document, and adding their respective feedback in track-changes mode.
- **Demonstrate:** The Initiator receives notifications that all 5 agencies have responded, resolves any conflicting comments, and finalizes the national position paper. Once final approval is granted, **the system securely locks the document** to prevent further unauthorized edits.

Phase 5: Live Meeting Phase Collaboration

- **Action:** Switch context to the actual dates of the IMO committee meeting. Log in as a **Delegation Member** attending the session.
- **Demonstrate:** Open the dynamic "Meeting Phase" module. Showcase the **live discussion boards and real-time co-editing interface** where delegates can tweak interventions and make last-minute tracked changes as actual committee deliberations evolve on the floor.

Phase 6: Post-Meeting Analytics & Archival

- **Action:** Log in as the **Super User / Delegation Leader** post-meeting.
- **Demonstrate:** The system automatically generating Summary Reports and Minutes of Meetings (MoM), complete with attendee lists and action items.
- **Demonstrate:** The auto-creation of a "To-Do List" for pending regulations, amendments, and follow-ups.
- **Demonstrate:** A role-based analytical dashboard displaying member participation metrics, task completion rates, and export options in XML, Excel, and PDF formats.

4. Key UI/UX & Technical Constraints to Highlight in the Demo

- **Security & Auditability:** Visually emphasize the centralized audit log tracking every login, document change, and approval action. Mention the system's compliance with Zero Trust, MFA, and DPDP Act 2023.
- **Cloud-Native & Responsive:** Ensure the UI design is responsive (desktop, tablet, mobile) and complies with accessibility standards, simulating a scalable cloud application.
- **Dashboards:** Ensure the landing pages clearly separate **"To-Do tasks"**, **"Upcoming Meetings"**, and **"Pending Approvals"** based on the logged-in persona.

RFP Compliance Matrix

Point	Sub Point	Dev Status	Remarks
User Roles	Super User (DGS/DDG – International Cooperation): Full configuration rights, including committee setup, user onboarding, workflow management, and oversight.	Yes	
	Administrators: Manage shadow committees, agenda, meetings, documents, and task assignments.	Yes	
	Delegation Leaders: Lead committee-level activities, consolidate feedback, approve final papers, and manage delegation outputs.	Yes	
	Coordinators: Manage sub-groups or correspondence groups, assign tasks, consolidate member feedback.	Yes	
	Members: Review agenda documents, provide comments/feedback, complete assigned tasks.	Yes	
	Consultants/Support Staff: Support drafting and documentation under delegated authority.	No	Viewer does not have drafting document functionality
User Authentication and Security	Secure login with username and password.	Yes	
	Multi-factor authentication (MFA) for sensitive roles.	Yes	
	Role-based permissions ensuring users only access relevant committees, documents, and tasks.	Yes	
	Full audit trail of login attempts, approvals, edits, and submissions.	Yes	
	Support for Single Sign-On (SSO) with government identity systems.	No	
Shadow Committee and Meeting Management	Repository of all IMO committees, sub-committees, Assembly, Council, with ability to expand for ILO, IMSO, and bilateral/regional collaborations (such as JWG).	Yes	
	Meeting creation and scheduling with metadata (dates, location, agenda, participants).	Yes	
	Dashboard view per meeting: showing agenda, uploaded documents, tasks, deadlines, and participation status.	Yes	
	Chronological listing of past and upcoming meetings.	No	
	Calendar sidebar with hover-over summaries of upcoming meetings.	Yes	
Agenda and Group Management	Each meeting to contain agenda items with linked documents, tasks, and assigned members.	Yes	
	Creation of groups and sub-groups linked to agenda items.	Yes	
	Group roles: Convener, Coordinator, Members.	Yes	
	Ability to create correspondence groups with dedicated task tracking.	Yes	
	Automated role-based notifications and reminders for assigned responsibilities.	Yes	
	Self-service for admins to add consultants/support staff.	Yes	
Task Management	Task creation by leaders or coordinators with linkage to agenda/document.	No	
	Assignment to one or multiple members with due dates.	Yes	
	Member view of pending, ongoing, and completed tasks via personal dashboard.	No	
	Automatic reminders for approaching or overdue deadlines.	No	
	Escalation workflow for unresolved tasks.	No	

	Automatic reminders for approaching or overdue deadlines.	No	
	Escalation workflow for unresolved tasks.	No	
	Leaders' dashboard summarizing all pending/completed tasks. Task completion summary reports exportable in XML/Excel formats.	No	
Document and Paper Preparation	Upload, view, download, and archive official meeting documents.	No	Archive official meeting documents is not present
	Creation of dedicated paper preparation folders for each meeting/agenda.		
	Multi-level approval workflow: Member → Coordinator/group leader → Delegation Leader → CS/NA/CSS → DG/MoPSW.	Yes	
	Version control with automatic timestamping and rollback capability.		
	Document locking upon finalization by Delegation Leader.	Yes	
	Export options in PDF, XML, and Excel formats.	No	
Feedback and Review	Members provide structured feedback via rich-text editor.	Yes	
	Feedback consolidated by coordinators at group level.	Yes	
	Delegation leader compiles committee-level final response.	Yes	
	Dashboards showing pending/overdue feedback at user, group, and committee level.	Yes	
	Historical archive of feedback per meeting/agenda for institutional memory.	No	
	Automated tools for comparison of successive versions.	No	
	Structured templates for interventions, comments, and national positions.	No	
	AI-assisted summarization of multiple feedback inputs (optional, future-ready).	No	
Collaboration and Discussion Interface	Real-time discussion boards linked to specific agenda items.	No	
	Ability for multiple users to simultaneously edit draft papers with attribution and tracked changes.	No	
	Commenting, tagging, and @mention functionality for collaboration.	No	
	Final approval workflow with locking of agreed text before submission.	No	
Reporting and Monitoring	Auto-generation of Summary Report, Minutes of Meetings (MoM) with attendee list, agenda discussion, and decisions taken after the IMO meeting.	No	
	Preparation status reports (per committee, per meeting).	No	
	Tracking of national stand/intervention across agenda items.	No	
	Member performance metrics: meetings attended, agenda involvement, interventions made.	No	
	Visualization tools (charts, progress indicators) for leadership monitoring.	No	
	Export options: PDF, Excel, XML.	No	
International Engagements Module ("Others+")	Repository for bilateral and regional working group activities.	No	
	Upload of Terms of Reference, agreements, MoUs, minutes, and action items.	No	
	Tracking of outcomes, resolutions, and progress against commitments.	No
